## **DETAILED ACTION**

### **PRIOR ART**

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,363,093 to Williams et al. because it teaches measuring the height of fluid in a fluid storage and using the height measurement along with other measurements in a regression analysis to calibrate volume meters for the fluid storage.

U.S. Patent No. 4,977,528 to Norris because it teaches measuring the height of fluid in a fluid storage and using the height along with other measurements in a regression analysis to calibrate volume meters for the fluid storage.

U.S. Patent No. 5,544,518 to Hart et al. because it teaches using height measurements of two tanks in a regression analysis to determine a ratio between the derivative of volume between the two tanks as volume moves from one to the other in order to calibrate the measuring system.

U.S. Patent No. 5,297,423 to Keating et al. because it teaches measuring fluid height in a fluid storage and using this along with other measurements and variables to perform a regression analysis to determine a calibration factor for flow meters associated with the fluid storage.

U.S. Patent No. 5,757,664 to Rogers et al. because it teaches determining tank volume using compressed matrix format statistical analysis from which this application claims benefit of 35 U.S.C. 120.

***Allowable Subject Matter***

2. Claims 1-6 allowed.
3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-6 in a system for determining a volume of fluid associated with a fluid storage and dispensing system, the volume having a height and the system measuring the height by collecting a plurality of height measurements, is the inclusion of the method steps of storing the plurality of height measurement data in a compressed matrix format, and performing regression analysis using the compressed matrix format to calculate the volume of fluid. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
